Sir:

In response to the non-final Official Action mailed on September 11, 2002,
please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend claims 1, 4, 7, 10, 16, 19, 25, 28 and 34 as shown in the
Appendix. The claims as amended in clean form are presented below.

1. (Amended) A method for driving a recording head having a plurality of
heating elements as driving elements for ejecting ink droplets from a plurality of
nozzles, the plurality of heating elements being arranged in a direction substantially
perpendicular to the direction of carrying a carried recording medium, the method
comprising:

a time-division driving step of dividing the plurality of heating elements into
a plurality of blocks, each block consisting of a predetermined number of spatially
arranged heating elements of the plurality of heating elements corresponding to the
plurality of nozzles, and sequentially driving each set of heating elements
simultaneously driven over the respective blocks, in a time-divisional manner in a
driving order so that non-adjacent heating elements are driven next to avoid cross-talk
due to driving adjacent heating elements; and

a recording step of ejecting ink droplets from the nozzles corresponding to
the driven heating elements and impacting the ink droplets on the recording medium,
